

Structures and STEM for KS1 & 2

Science - Design Technology – Maths

Delivered by UK STEM in partnership with Mindsets this Planet Maths online course is based on using a range of low cost materials to both explore and use structures and mechanisms, also with a focus on putting maths into context. This online course covers:

- How to create successful structural challenges, that are rich in learning
- Towers, bridges and boats
- Developing maths and science skills

You will carry out the practical activities and leave the course confident to continue the **technical knowledge** necessary to develop structures projects in your school.

Price: Please ask

(Max 3 people per session)

Includes: Materials required (optional)
