## International STEM Activity Programme

The team at UK STEM Ltd are passionate about contextualsing and bringing the world of Science Technology Engineering and Mathematics (STEM) to life through a range of fun and exciting educational activities for young people.

Following a number of years of delivering activities in UK schools and working in partnership with a range of schools, colleges, universities as well as industry, UK STEM have introduced a bespoke programme for international students, providing an engaging programme of activities in the UK that will not only enhance STEM Learning but to also develop an understanding of British culture and language.

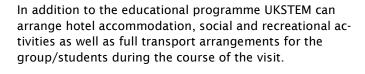

Students will also participate and work towards a Bronze and/or Silver Global STEM Award as part of the programme.

The Global STEM Award has been developed through a partnership between UKSTEM, Mindsets and the University of Wolverhampton that gives students the opportunity to explore and research realworld STEM challenges as part of a project within the programme.

A programme can be tailored exactly to the needs of your group of students to include the following::

- Interactive, practical STEM Activities delivered in partnership with a range of educational establishments in the Yorkshire region
- University campus tours and school visits
- Bronze/Silver Global STEM Award
- UK Cultural and English Lessons and activities built into the programme

## Sample International STEM Programme Schedule:

Table below shows programme of a recent visit of 70 Chinese Students from Beijing:

	Morning Session	Afternoon Session	Evening Session
